

RAFAEL ROMÁN-CABALLERO

I am cognitive psychologist that have been able to bring together **my two passions**: the understanding of **the brain and the mind**, and **music**. During my childhood I learnt to play the violin and discovered my passion for melodies and the hidden emotions, imperturbable in time, behind the scores. Years later I studied a **Bachelor's degree in Psychology** (2013–2017) at the University of Granada (Spain), where I also completed a **Master's degree in Cognitive Neuroscience** (2017–2018) and a **PhD in Psychology of Music** (2018–2023). Currently, I work at the Department of Experimental Psychology of the **University of Granada (Spain)** and in the Department of Psychology, Neuroscience and Behaviour of the **McMaster University (Canada)** in the context of a **Marie Skłodowska-Curie Global Postdoctoral Fellowship**. My work focuses on different aspects of psychology of music, cognitive training, attention and vigilance, social cognition, and meta-science. My current project is '*Distinguishing infant-directed speech and songs: The distinctive evolution of acoustic features and visual entrainment in infants*'.
